

BENEFITS OF H₂O₂ ON DIFFERENT SPECIES OF FARM ANIMALS

BENEFITS FOR BEEF CATTLE

- **Reduces respiratory infections, E-coli, scours and strep**
- **Increase water and feed consumption which improves feed efficiency**
- **Help eliminates foot rot and improves hoof condition**
- **Cattle waters are cleaner and algae free**
- **Reduction of medications**
- **Increases colostrums**

BENEFITS FOR DAIRY CATTLE

- **Increase water consumption which gives better feed conversion**
- **Increased milk yields**
- **Increases butter fats content**
- **Lower somatic cell counts**
- **Increase levels of colostrums after calving**
- **Helps reduce scours in new born calves**
- **Reduces incidences of mastitis**
- **Stronger heat cycles improves conception**
- **Helps eliminate foot rot and hairy warts**
- **Removes ammonia in the barns**

BENEFITS FOR BEEF POULTRY

- **Reduces ammonia odours**
- **Drier litter**
- **Lower mortality rates**
- **Reduces medication**
- **Lowers poultry diseases**
- **Higher feed conversion**

BENEFITS FOR SWINE

ELIMINATES OR LOWERS INCIDENCE OF:

- **Stomach ulcers**
- **Lower mortality in weaner pigs**
- **Deters tail biting**
- **Less stress and reduces medication**
- **Improves water consumption which gives better feed conversion and faster gains**
- **Reduces ammonia in the barns**
